# GroundJet

by LCS

From the star on the grille to its spacious interior, the full-size Sprinter Ground Jet reveals just how luxurious a Mercedes-Benz Sprinter Van can be. The aerodynamic exterior elegantly defies the styling limitation typical of large luxury vehicles. And its open concept interior with spacious seating areas, tall standing height and elegant lighting were customized precisely to LCS's preferences. Ultra-high-end finishes, advanced electronics and a lengthy list of options allowed LCS to configure a Professional Series Sprinter Van with exactly what our customers need to impress clients and elevate business travel to an art form.
